Dear Ms. Roth:

OFFICE OF WASTE
& CHEM. MGMT.

RE: Draft Bridge Document Report 3: Terminal 91 Tank Farm Site Agreed Order No. DE 98HW-N108

The Draft Bridge Document Report 3 (BDR-3), prepared for the Terminal 91 Site PLP Group (PLP Group) by Aspect Consulting, was received by the Department of Ecology (Ecology) on May 10, 2004. This report addresses the portion of the Port of Seattle (POS) Terminal-91 facility where RCRA corrective action is being performed pursuant to the Model Toxics Control Act (MTCA) Agreed Order No. DE 98HW-N108.

With this letter, Ecology is **approving** the Bridge Document Report 3, with the understanding that changes in the site model established during the review of future site work and reports could affect how the information within this document is used.

Please submit the draft outline for the completion of the RCRA Facility Investigation (RFI), as discussed via telephone, by the end of September 2004. It is Ecology's understanding that this draft outline will lead to a final document that will pull together the Bridge Document work with the RIDE report in order to finalize the RFI. If the draft document does not fulfill the requirement for completing the RFI, then Ecology could ask for a new inclusive RFI to replace the January 6, 1999 Remedial Investigation/Data Evaluation Report and the work completed since then under the BDR investigation work.

Thank you for your submittal. If you have any questions concerning this letter please contact me at the Department of Ecology Northwest Regional Office by phone at (425) 649-7280 or by email at gttri461@ecy.wa.gov.

Sincerely,

Galen H. Fitt
